

SANDEEP KAHAWATHTHA

Raddolugama, Sri Lanka | +94775699653 | [Gmail](#) | [LinkedIn](#) | [GitHub](#)

Proactive and analytical 4th-year Software Engineering undergraduate (SLIIT) seeking an internship to apply skills in full-stack web and mobile development. Highly proficient in the MERN stack, NestJS, and React Native, with strong expertise in database management using MongoDB, MySQL, and Firebase. Focused on crafting dynamic user experiences and building efficient, scalable backend solutions to deliver impactful results.

TECHNICAL SKILLS

- | | | | |
|--------------|------------|------------------|----------------|
| • JavaScript | • Python | • Java | • Laravel |
| • C | • SQL | • HTML | • Git |
| • C++ | • MySQL | • CSS /Bootstrap | • React Native |
| • PHP | • NestJs | • Tailwind/MUI | • Angular |
| • TypeScript | • Firebase | • MERN | • Figma |

PROJECTS

Elber E-commerce Platform | Full-Stack Developer | NestJS, Next.js, React, MongoDB, TypeScript | [Link](#)

- Developed and maintained core functionalities of a production-ready e-commerce platform, including product catalog, shopping cart, and checkout workflows.
- Built a NestJS-based RESTful API with Mongoose for robust data modeling and integrated Firebase Storage for hosting product media.

Polygon Builds (Pvt) Ltd | Web Application for 3D printing | MERN | [Link](#) | [Repository](#)

- Developed a *secure user authentication system* with Google sign-in, ensuring seamless and secure access for users.
- Built features for *3D model uploading and advanced model previewing*, enabling users to view and interact with their designs in detail before finalizing orders.

Ceylon Herb Care (Pvt) Ltd | Web Application for e-commerce store | MERN | [Link](#)

- Implemented a *Seller Partnership Management Module*, enabling seller onboarding, authentication, and partnership workflows with automated email notifications, secure admin oversight, and dynamic reporting for historical performance data.
- Built a comprehensive *Order Management System* for sellers to view product details, place and manage orders, select payment methods, and receive real-time notifications on order status, incomplete payments, and invoice generation.
- Developed features for *product updates, appointment scheduling*, and robust admin controls, ensuring efficient communication, secure data management, and seamless seller integration into the platform.

MiniMed | Mobile Application | React Native | [Link1](#) | [Link2](#)

- Developed a *Vaccination Management System* to display vaccination schedules based on age and medical history, including due and completed vaccinations.
- Implemented notifications for upcoming vaccination dates, user confirmations, and feedback submission.
- Designed features for allergy and health condition management with alerts for special considerations.

Techart Solutions (Pvt) Ltd | RFID Reading Web Application | Laravel | [Link](#)

- Developed an RFID web application that seamlessly integrated with RFID data through the database.
- Implemented features for RFID configuration, tapping, and history management, ensuring efficient and user-friendly operations.
- Contributed to the complete web app implementation, enhancing the management and utilization of RFID technology.

Personal Finance Tracker | Backend System | Node.js, Express, MongoDB, JWT, Jest | [Link](#)

- Engineered a robust backend system for managing personal income, expenses, budgets, and financial goals.
- Implemented secure user authentication with JWT and full CRUD operations for all financial modules.
- Integrated the Currencylayer API for multi-currency support and built comprehensive financial reporting endpoints.
- Ensured code quality and system reliability through unit and integration testing with Jest and Super test.

Fashion Globe | Sales Optimization System | MERN | [Link](#)

- Developed a *Customer Feedback System* with product reviews, admin dashboard for review management.
- Built a *Loyalty Management System* for tracking and redeeming points, with a reward catalog, personalized offers, and seasonal discounts.
- Integrated *analytics and reporting tools* to track feedback trends, loyalty program performance, and customer engagement.

CleanCity | Smart Waste Collection System | React, Firebase | [Link](#)

- Designed and implemented administrative features, including staff management, task assignment, collection session scheduling, and route optimization.
- Developed data analysis tools and reporting frameworks to generate performance and efficiency reports, enabling data-driven decision-making and process optimization.

E-voting System | Full-Stack Application | React, Node.js, Express, MongoDB, JWT | [Link](#)

- Developed a secure, multilingual (Sinhala, Tamil, English) e-voting platform with NIC-based authentication and a "one-vote-per-voter" policy.
- Implemented secure user management with JWT authentication and profile locking functionality after a vote is cast.
- Ensured system reliability for high-traffic periods through comprehensive stress testing.

EDUCATION

BSc (Hons) in Information Technology Specialization in Software Engineering

2022 – Expected Graduation: 2026

Sri Lanka Institute of Information Technology (SLIIT), Sri Lanka

ACHIEVEMENTS

- Open Category Teams - Educational Achievement Certificate (IDEALIZE 2024 | AIESEC in UOM). | [Link](#)
- Python for Beginners (code - GLd2Hz0BCL) (CODL University of Moratuwa) | [Link](#)
- Python Programing E-Certificate (Following) (CODL University of Moratuwa)
